Reply-to: East Carolina University Calendar discussion List (CALNDR-L@LISTSERV.ECU.EDU)

To: CALNDR-L@LISTSERV.ECU.EDU

There are 8 of the calendarists (whose name I'm doing a serch on) now:

- 1- Lilius
- 2- Clavius (contributed Tom Peters)
- 3- Sosigenes
- 4- Achelis
- 5- Comte
- 6- Kidinnu or Cidenas (contributed Tom Peters)
- 7- Maimonides (contributed Kev Palmen)
- 8- Meton (contributed Brij Bhushan Vij)

If there are any other, please help me.

To: feedback@hindustantimes.com

For Editorial Team

I lived through post partition since I was a child of 11-years, during Indo-Pak partition in August 1947. Had NO EDUCATION, but dreamt of studying to upgrade my career, as son of a Hd Clark in Northern Railways - frankly with nothing to look forwards to. Over the years, I joined Indian Air Force in September 1954 http://www.brijvij.com/bbv_brief.pdf, an qualified to become an Engineer to earned my Commission in Air Force. I was, perhaps not destined to grow for higher ranks and got switched to become India's (or perhaps the World's first METRICOLOGIST - to mean an individual who examined missing areas in Metrication (Le Systeme Internationale d'Unites) and the science of Metrology (Weights & Measures). Since 1970-71, a stray thought 'Time by Metric' led me to examine Metric Norms for Time Standard (1971) and then to The Metric Calendar (1973). Please see (for my published contributions between 1971 thro 1983):

http://brijvij.com/eBookCopyrights-n-Patent_ParliamentaryReferences.doc.

My examination of the World Calendar and discussions with USMA@colostate.edu and <CALNDR-L@LISTSERV.ECU.EDU> provided me the right oppertunity to place my ideas imbedded into India past glory of Indus Civilisation via the Meohenjo-Daro Great Bath and establish that Harappan Calendar scale was marked to work as *Tithi Based Calendar* rather than solar based days and 19-year cycle/(5*47)=235-lunation - known as Metonic cycle. Where did Meton get this from - was it from Harappans? Please see:

http://www.brijvij.com/bbv_Lnr-Tithi_HarrCal..pdf

My summing up of aimed reform for Gregorian calendar is simple - just shifting the day of July 31st to the month February as February 29th http://www.brijvij.com/bb_metro-

[contrbn.2007.pdf](#).

Please feel free to call/contact me for clarification/elucidation of the DREAMS as I see.

Regards,

Brij Bhushan Vij

Identifying the Wild Beast and Its Mark

(from Tony Baba 20071017)

DO YOU enjoy solving a mystery? To do so, you look for clues that help you work your way toward the solution. In his inspired Word, God provides the needed clues with regard to the number 666, the name, or mark, of the wild beast of Revelation chapter 13.

In this article, we will look at four main lines of reasoning—vital clues—that will reveal the meaning of the mark of the beast. We will consider (1) how Bible names are sometimes chosen, (2) the identity of the wild beast, (3) what is meant by 666 being “a man’s number,” and (4) the significance of the number 6 and why it is written in triple digits, namely, 600 plus 60 plus 6, or 666.—Revelation 13:18.

Bible Names—More Than Just Labels

Bible names often have special significance, particularly when given by God. For example, because Abram would become the father of nations, God changed the patriarch’s name to Abraham, meaning “Father of a Multitude.” (Genesis 17:5, footnote) God told Joseph and Mary to call Mary’s future child Jesus, which means “Jehovah Is Salvation.” (Matthew 1:21, footnote; Luke 1:31) In harmony with that meaningful name, through Jesus’ ministry and sacrificial death, Jehovah made possible our salvation.—John 3:16.

Accordingly, the God-given number-name 666 must symbolize what God sees as defining attributes of the beast. Naturally, to understand those traits, we need to identify the beast itself and learn about its activities.

The Beast Exposed

The Bible book of Daniel sheds much light on the meaning of symbolic beasts. Chapter 7 contains a vivid tableau of “four huge beasts”—a lion, a bear, a leopard, and a fearsome beast with big teeth of iron. (Daniel 7:2-7) Daniel tells us that these beasts represent “kings,” or political kingdoms, that rule in succession over vast empires.—Daniel 7:17, 23.

Regarding the beast of Revelation 13:1, 2, *The Interpreter’s Dictionary of the Bible* points out that it “combines in itself the joint characteristics of the four beasts of Daniel’s vision Accordingly, this first beast [of Revelation] represents the combined forces of all political rule opposed to God in the world.” This observation is affirmed by Revelation 13:7, which says of the beast: “Authority was given it over every tribe and people and tongue and nation.”

Why does the Bible use beasts as symbols of human rulership? For at least two reasons. First, because of the beastly record of bloodshed that governments have accrued over the centuries. “War is one of the constants of history,” wrote historians Will and Ariel Durant, “and has not diminished with civilization or democracy.” How true that “man has dominated man to

his injury”! (Ecclesiastes 8:9) The second reason is that “the dragon [Satan] gave to the beast its power and its throne and great authority.” (Revelation 12:9; 13:2) Accordingly, human rulership is a product of the Devil, thus reflecting his beastly, dragonlike disposition.—John 8:44; Ephesians 6:12.

This does not mean, however, that every human ruler is a direct tool of Satan. Indeed, in one sense, human governments serve as “God’s minister,” giving structure to human society, without which chaos would rule. And some leaders have protected fundamental human rights, including the right to engage in true worship—something that Satan does not want. (Romans 13:3, 4; Ezra 7:11-27; Acts 13:7) Still, because of the Devil’s influence, no human or human institution has ever been able to bring lasting peace and security to the people.—John 12:31.

“A Human Number”

A third clue to the meaning of 666 lies in its being “a man’s number,” or as *The Amplified Bible* puts it, “a human number.” This expression could not refer to an individual human, for Satan—not any man—has authority over the beast. (Luke 4:5, 6; 1 John 5:19; Revelation 13:2, 18) Rather, the beast’s having “a human number,” or marks, suggests that it is a human entity, not spirit or demon, and that it therefore manifests certain human traits. What might they be? The Bible answers, saying: “All [humans] have sinned and fall short of the glory of God.” (Romans 3:23) The beast’s having “a human number,” therefore, indicates that governments reflect the fallen human condition, the mark of sin and imperfection.

History bears this out. “Every civilization that has ever existed has ultimately collapsed,” said former U.S. Secretary of State Henry Kissinger. “History is a tale of efforts that failed, of aspirations that weren’t realized . . . So, as a historian, one has to live with a sense of the inevitability of tragedy.” Kissinger’s honest appraisal testifies to this fundamental Bible truth: “To earthling man his way does not belong. It does not belong to man who is walking even to direct his step.”—Jeremiah 10:23.

Now that we have identified the beast and discerned how God views it, we are in a position to examine the final part of our puzzle—the number six and why it is written in triple digits—that is, 666, or 600 plus 60 plus 6.

Six Repeated Three Times—Why?

In the Scriptures, certain numbers have symbolic significance. The number seven, for example, is often used to symbolize that which is complete, or perfect, in God’s eyes. For instance, God’s creative week comprises seven ‘days,’ or extended time periods, during which God *completely* accomplishes his creative purpose regarding the earth. (Genesis 1:3–2:3) God’s “sayings” are like silver that has been “clarified seven times,” thus *perfectly* refined. (Psalm 12:6; Proverbs 30:5, 6) The leper Naaman was told to bathe seven times in the Jordan River, after which he was *completely* healed.—2 Kings 5:10, 14.

Six is one short of seven. Would it not be a fitting symbol of something imperfect, or defective, in God’s eyes? Yes, indeed! (1 Chronicles 20:6, 7) Moreover, six repeated three times, as 666, powerfully stresses that imperfection. That this is the correct view is supported by the fact that 666 is “a human number,” as we have considered. Thus, the beast’s record, its “human number,” and the number 666 itself all point to one unmistakable conclusion—gross shortcoming and failure in the eyes of Jehovah.

The portrayal of the beast’s deficiencies calls to mind what was said about King Belshazzar of ancient Babylon. Through Daniel, Jehovah said to that ruler: “You have been weighed in the balances and have been found deficient.” That very night Belshazzar was killed, and the mighty Babylonian Empire fell. (Daniel 5:27, 30) Likewise, God’s judgment of the political beast and of those with its mark spells the end of that entity and its supporters. In this instance, however, God will eradicate not just one political system but every vestige of human rule.

(Daniel 2:44; Revelation 19:19, 20) How important, therefore, that we avoid having the deadly mark of the beast!

The Mark Identified

Immediately after disclosing the number 666, Revelation mentions 144,000 followers of the Lamb, Jesus Christ, who have his name and the name of his Father, Jehovah, written on their foreheads. These names identify the bearers as belonging to Jehovah and to his Son, about whom they proudly bear witness. Likewise, those having the mark of the beast proclaim their servitude to the beast. Thus, the mark, whether on the right hand or on the forehead, figuratively speaking, is a symbol that identifies its bearer as one who gives worshipful support to the beastlike political systems of the world. Those having the mark give to “Caesar” that which rightly belongs to God. (Luke 20:25; Revelation 13:4, 8; 14:1) How? By giving worshipful honor to the political state, its symbols, and its military might, to which they look for hope and salvation. Any worship that they render the true God is merely lip service.

In contrast, the Bible urges us: “Do not put your trust in nobles, nor in the son of earthling man, to whom no salvation belongs. His spirit goes out, he goes back to his ground; in that day his thoughts do perish.” (Psalm 146:3, 4) Those who heed that wise counsel are not disillusioned when governments fail to deliver on their promises or when charismatic leaders fall from grace.—Proverbs 1:33.

This does not mean that true Christians sit back and do nothing about mankind’s plight. On the contrary, they actively proclaim the one government that will solve mankind’s problems—God’s Kingdom, which they represent.—Matthew 24:14.

God’s Kingdom—Mankind’s Only Hope

When on earth, Jesus made God’s Kingdom the main theme of his preaching. (Luke 4:43) In his model prayer, sometimes called the Lord’s Prayer, Jesus taught his followers to pray for that Kingdom to come and for God’s will to be done here on earth. (Matthew 6:9, 10) The Kingdom is a government that will rule over the entire earth, not from some earthly capital, but from heaven. Hence, Jesus called it “the kingdom of the heavens.”—Matthew 11:12.

Who is better suited to be King of that Kingdom than Jesus Christ, the one who died for his future subjects? (Isaiah 9:6, 7; John 3:16) Soon this perfect Ruler, now a mighty spirit person, will hurl the beast, its kings, and its armies into “the fiery lake that burns with sulphur,” a symbol of complete destruction. But that is not all. Jesus will also get rid of Satan, something that no human could ever do.—Revelation 11:15; 19:16, 19-21; 20:2, 10.

God’s Kingdom will bring peace to all its obedient subjects. (Psalm 37:11, 29; 46:8, 9) Even sorrow, pain, and death will be no more. What a glorious prospect for those who remain free of the mark of the beast!—Revelation 21:3, 4.

[Footnotes]

For an in-depth discussion of these verses, see chapter 28 of the book *Revelation—Its Grand Climax At Hand!*, published by Jehovah’s Witnesses.

While recognizing that human rulership is often beastlike, true Christians subject themselves to the governmental “superior authorities,” as the Bible directs. (Romans 13:1) When such authorities command them to act contrary to God’s law, however, they “obey God as ruler rather than men.”—Acts 5:29.

[Box on page 5]

Clues to the Meaning of 666

1. Bible names often say something about the bearer’s traits or life, as in the case of Abraham, Jesus, and many others. Likewise, the beast’s number-name encodes its characteristics.

2. In the Bible book of Daniel, the various beasts represent successive human kingdoms, or empires. The composite beast of Revelation 13:1, 2 symbolizes the worldwide political system, empowered and controlled by Satan.
3. The beast's having "a man's number," or "a human number," indicates that it is a human entity, not a demon. Hence, it reflects human failings resulting from sin and imperfection.
4. In God's eyes, the number six, being short of the Biblically complete, or perfect, seven, points to imperfection. The mark 666 emphasizes that deficiency by repeating the number three times.

[Pictures on page 6]

Human rulership has proved to be a failure, well symbolized by the number 666

Derek, sir:

>using a combination of 7,8,9cycles=24 cycles (for 24 hour measure)

>896/9=99.555556

>896/7=128 (896+128=1024/8=128)

>789/9=87.666667

789-years =288176.087649457209 days=41168 Weeks. This is 298*966 plus 307 tithi, to give Mean Year = 365.242078580482 days

10+41*19-year cycles =789-years. This may have a year for epact adjustment once every 71-years or so (correcting precession of equinoxes).

I shall, however, aim at 896-years to give Mean Year =365.2421875 days, which is 47*19-year cycles with ONE year (as year for epact adjustment) placed every 224-years except 896th.

Brij,

>896-years accomodate EXACTLY 159 LWks, although 896 is not divisible by six (6), to give Mean Year value of: $7(52 + 1/6 + 29/2688) = 365.2421875$ days.

It does match 6 days if one keeps in mind the use of the $1=(2*.5)$ as a common (.5) point split cycling value as you see in operation in the image, so you have 6 days plus 1 split day forming the 7th day as in your calculation, the 7th day is the central measuring day issue for the calendar, this day being (Sunday) constantly in use as a ballancing measure of time and space and energy etc for the church. The 6 days being ballanced on the 7th, which means the 6th day is KNOWN not to be an accurate measure of time only being refered to as the 6 days of creation as in the week, it is the 7th cycle/day which brings it about to be accurate as in th bible text (and on the 7th day god rested from all that he had done).

$[3*(7*128) = 3*[896\text{-yrs}/159\text{ LWks}]$.
 $[3*(9*128) = ?$

$159/6=26.5$ which is a split value of lunar weeks $2*(26.5)=53-1$ week in a yearly cycle so this one day/week/year matches your kepler first week, the bible quotes this as a YEAR IS AS A DAY which is a division formed of 2 days or weeks between the $1\text{ day}=(2*.5)$ and in the year $2*(26.5)=52$.

using a combination of 7,8,9cycles=24 cycles (for 24 hour measure)

$896/9=99.555556$
 $896/7=128$ ($896+128=1024/8=128$)
 $789/9=87.666667$

$99.555556 - 98.555556=1.000000$

It would seem that the keplers laws and calculations are in the genesis calendar image but I cant quite match everything up yet, I only know that the image is accurate relative to time,space,mass and energy being optimised and balanced by the one split day.

896/9 matches weeks 99.555556
896/7 matches month $128/9=14.222222/2=7.1111111$
789/9 matches days 87.666667

The year zero or "era" of "creation" therefore has to be in the balance between $1792(14*128)$ and $1920(15*128)$ (overall cycle balance 128) i.e.: - IN computer "BIT" (BYTE) MEASURE form
0,1,2,4,8,16,[32],64,(128),64,[32],16,8,4,2,1,0

This suggests to me to be a MIND/memory/body energy SYSTEM using a method of sharing energy on 3 levels optimised on a fourth level in IMAGE/material form as in atoms,molecules and cells finalising in life forms all using the same energy source as in the case of the SUN all reflected as in the calendar image, but the central balance is OFFSET just like the earth at the [32] ($4*8$) position obviously to ensure that not all the energy is drained off or used up at any one time from the core=SUN which is why we have night and day, there is always a core amount in place within the SUN, this would also account for the computer LOGIC terms of ROM and RAM one is not accessible and the other is relative to the amount of energy/memory available for use.

32 would also equate to $32/6\text{"days"}=5.3333333$ (the .5 dot in a group of 3 over 7 relative cycles) to match the $15*128=1920$, it also fits 29 cycles ($29*3$)=87genesis cycles.

How would the number 789 fit into your calendar calculations for accuracy etc using a combined earth,lunar,solar 9 day cycle..? as in $6*7*11=693/9=11$ solar energy

Derek

Subject: coincidence 218696 RE: number of the beast is 696 (not 666)

Derek, sir:

Indeed thoughtful of you to recall, our previous contacts. I thought I have lost you. However, I live on long lease & positive attitude!

$>1000(\text{cycle yrs})-1=(5.5)=999-696=303/3=101+9=110/5.5=20/2=10$

Yes, 96, 90 are also linked to 87 as start of my calendar from Year $[(Y2000 - 80)/(+or-)128]$ i.e. $[(+or-)1920/128]+87=2007$, being the first Keplers' Leap Week,

see http://www.brijvij.com/bb_div.6vshexade400-yr.LWks-distr..pdf, if Era start is taken at

Y1920 $(15*128)$ that set itself at Year ZERO CE; and at Kali Era $(24*128)+30=3102$ nd. My investigation of $[3*(7*128)=3*[896\text{-yrs}/159\text{ LWks}]$. I may also point another coincidence that 896-years accomodate EXACTLY 159 LWks, although 896 is not divisible by six (6), to give Mean Year value of: $7(52+1/6+29/2688)=365.2421875$ days.

Genesis interpretation, I leave it to you or other experts on the subject.

My brief http://www.brijvij.com/bbv_vip-brief.pdf includes my servive number $(218000+696=218696)$ that I was allotted (1954 Sept. 14th) on joining Air Force in ranks.

Regards,

Brij Bhushan Vij

Subject: number of the beast is 696 (not 666)

Date: Fri, 5 Oct 2007 18:23:59 +0100

Brij,

Sorry for not being in contact had a lot of things to do. A bit of info for you, I believe in your calculations some time ago you came up with the cycle value of 96, well this does match genesis as I mentioned at the time, only it seems you have to reverse it to produce a longer reversing 3/4 digit value 696. For some reason people have assumed the number of the beast in church terminology to be 666 when in fact its actually 696, the central 6 should be inverted enabling the 96 (96.96) to be run in two dual apposing directions on either side of the central number $9+1=10$ as in a balancing differential equation measure using the $5+96=(101)=96+5$. So by using the value 87 of a genesis cycle $696/87=8$ then you get the balancing geometrical hour/sector/arc TIME balance of the world.

$10*10+10*1=110/10(\text{self~division})=11$ which is the sunburst cycle of the sun, $11/2=5.5$.

By using 4~ 9cycles $(4*4),(4*3),(4*2),(4*1),(5.5)$

$1000(\text{cycle yrs})-1=(5.5)=999-696=303/3=101+9=110/5.5=20/2=10$

By increasing the cycle value from 3 to $9+1=28(4*7)$ you get the difference of 6 days $(3*9=27\text{lunar})$ (between the 3 and the 9) as mentioned about the creation of the world (the balancing order of things days in the week+sunday).

So the central time clock keeps repeating 1 to $9+1=(5.5)=10$ over and over again using $3*9=27(\text{lunar})$ which is collectively combined with the central $10(+ -1)$ to make a sun and moon changing combination always balancing with 5.5, altogether they produce the overall $4*9=36+0$ 360 degree changing cycle/circle image but in the image you only see the $3*9$ cycle with the 4rth moving (.5) cycle DOT, the other half is always in the calculations as energy=(.5).

Just as Genesis says the DAY is always an ever-changing split measure day based on the balancing metric (.5) or (5.5).

My conclusions are that by simply removing and adding a (.5) measure of energy from a already formed energy source, one is able to maintain a sufficient/balancing output over a indefinite/eternal period of time with very little loss or drain on the source, because the ballance between time and temperature are being controled at around 70cycles/deg which is also the days of the whole week and the age of man ($7*10=70$).

Its the answer to eternal life (energy)? the sollution is already their and we are all part of the solution.

Derek

Subject: number of the beast is 696 (not 666)

Date: Fri, 5 Oct 2007 18:23:59 +0100

Brij,

Sorry for not being in contact had a lot of things to do. A bit of info for you, I believe in your calculations some time ago you came up with the cycle value of 96, well this does match genesis as I mentioned at the time, only it seems you have to reverse it to produce a longer reversing 3/4 digit value 696. For some reason people have assumed the number of the beast in church terminology to be 666 when in fact its actually 696, the central 6 should be inverted enabling the 96 (96.96) to be run in two dual apposing directions on either side of the central number $9+1=10$ as in a balancing differential equation measure using the $5+96=(101)=96+5$. So by using the value 87 of a genesis cycle $696/87=8$ then you get the balancing geometrical hour/sector/arc TIME balance of the world.

$10 \cdot 10 + 10 \cdot 1 = 110 / 10 (\text{self-division}) = 11$ which is the sunburst cycle of the sun, $11 / 2 = 5.5$.

By using 4~9 cycles $(4 \cdot 4), (4 \cdot 3), (4 \cdot 2), (4 \cdot 1), (5.5)$

$1000 (\text{cycle yrs}) - 1 = (5.5) = 999 - 696 = 303 / 3 = 101 + 9 = 110 / 5.5 = 20 / 2 = 10$

By increasing the cycle value from 3 to $9 + 1 = 28 (4 \cdot 7)$ you get the difference of 6 days $(3 \cdot 9 = 27 \text{ lunar})$ (between the 3 and the 9) as mentioned about the creation of the world (the ballancing order of things days in the week+sunday).

So the central time clock keeps repeating 1 to $9 + 1 = (5.5) = 10$ over and over again using $3 \cdot 9 = 27 (\text{lunar})$ which is collectively combined with the central $10 (+ -1)$ to make a sun and moon changing combination always balancing with 5.5, altogether they produce the overall $4 \cdot 9 = 36 + 0$ 360 degree changing cycle/circle image but in the image you only see the $3 \cdot 9$ cycle with the 4th moving (.5) cycle DOT, the other half is always in the calculations as energy = (.5).

Just as Genesis says the DAY is always an ever-changing split measure day based on the balancing metric (.5) or (5.5).

My conclusions are that by simply removing and adding a (.5) measure of energy from a already formed energy source, one is able to maintain a sufficient/balancing output over a indefinate/eternal period of time with very little loss or drain on the source, because the ballance between time and temperature are being controled at around 70 cycles/deg which is also the days of the whole week and the age of man $(7 \cdot 10) = 70$.

Its the answer to eternal life (energy)? the sollution is already their and we are all part of the solution.

Derek
